How To Select Correct Optical Swim Goggles

We need your SPH readings.

Optical swim goggles do not correct astigmatism (CYL).

	SPH	CYL	AXIS	PRISM	ADD
OD	-1.00	-0.25	005		+2.50
OS	-1.75				+2.50

OD – Right Eye: usually the top value in an eyeglasses prescription chart.

OS – Left Eye: usually the bottom value in an eyeglasses prescription chart. The measurements in the OS row are for the left eye.
