Everything in Swimming

**2019-2020**

[www.eyeline.com.au](http://www.eyeline.com.au)

## Microline®

Microline® is the evolution of Engineered Race Suit Technology. Eyeline has developed, in Australia, a state of the art treatment that further enhances water-repellent characteristics, which minimise drag and turbulence to increase glide time and efficiency through the water.

Microline® offers increased resistance to longer exposure in chlorinated water. The base channel technology of Microline® vastly reduces drag and surface resistance. Advanced knitting techniques provide increased modular strength for a tighter fit and feel. Constantly smooth compression helps a swimmer's skin stay flat during competition thus improving body dynamics. The Compression qualities of Microline® helps reduce muscular 'breakdown' thus, the loss of strength and endurance during competition. Recovery rates are enhanced by the compression feature.

## CRP® Chlorine Resistant Stretch Polyester

CRP® is designed for close to the body styling required for today's sport & fashion swimwear.

CRP® has excellent stretch & recovery with superior shape retention.

CRP® is soft to the hand with a high level of colour fastness.

CRP® is quick drying & resistant to chlorinated and salt water.

## Tuff®

Eyeline Tuff® 100% Nylon is quick-drying and resistant to most pool chemicals.

Eyeline Tuff® Nylon suits are self lined and made with medium weight fabric for comfort, fit and durability.

## Lycra®

Lycra® swimwear manufactured by Eyeline uses Invista Lycra® encompassing Prime Technology.

Prime Technology advantages are:

- 4.5 times the chlorine resistance of ordinary elastane
- Highest colour fastness values meeting the Oko Tex
- Standard 100
- Great Fit & Comfort
- Extra Strength
- Maximum Durability and Shape Retention
- UPF 50+ Sun Protection Factor

TRIATHLON SIZE CHART

Women's Microline Tri Suit Size	8	10	12	14
Chest (cm)	85	89	93	97
Waist (cm)	65	68	72	76
